

Cell Phone Evidence: From Seizure to Courtroom

Course Overview

Cell phones play a critical role in modern investigations, yet many officers are unaware of the full range of ways these devices can help solve crimes. This course provides step-by-step instruction on gathering, preserving, analyzing, and presenting cellular evidence in court. Attendees will gain the knowledge and practical skills needed to properly handle cell phone data from seizure through trial preparation.

Course Overview

Participants will learn to:

- **Understand the Three Types of Cellular Evidence:**
 - The Device
 - The Records
 - The Clouds
- **Preserve All Forms of Cellular Evidence** to maintain integrity for court
- **Identify Key Variables:**
 - Types of Phones
 - Cellular Providers
 - Cloud Storage
- **Conduct Forensic Examinations of Devices:**
 - How different forensic software yields different results
 - Types of data that can be recovered
 - Methods for proving ownership through device data
- **Examine Cellular Records:**
 - Understanding network differences
 - How to properly read and interpret the data
- **Work with Providers:**
 - Information available when a suspect is identified
 - Information available when no suspect is known
- **Map Locations** using different location-based results.
- **Prove Ownership Through Records**, even with pre-paid devices.
- **Identify Additional Evidence** such as void calls, voicemails, and call forwarding
- **Conduct Forensic Examinations of the Cloud:**
 - Which cloud services are available
 - How cloud data can aid an investigation
